

Steel & Fiberglass Doors

STEEL DOORS

Two Finish Options for Steel doors - HD and Sta-Tru. HD Steel may be painted the color of your choice, while Sta-Tru offers a prefinished white option. Steel door advantages:

DURABILITY

- ▶ Rot resistant bottom rails
- ▶ Rust resistant
- ▶ Resists cracking and warping
- ▶ Wood edge or steel edge

PERFORMANCE

- ▶ Available in 20 and 90 minute fire ratings
- ▶ Security of steel

ENERGY EFFICIENT FOR ADDED SAVINGS ON HEATING AND COOLING BILLS

- ▶ Insulated inner core insulates 5x better than real wood
- ▶ ENERGY STAR eligible

ENERGY EFFICIENT FOR ADDED SAVINGS ON HEATING AND COOLING BILLS

FIBERGLASS DOORS

Fiberglass is strong, durable, lightweight and impervious to many caustics and to extreme temperatures. These attributes make fiberglass, an ideal material for an exterior door that may face extremes in temperature, exposure to the elements and general wear and tear. Fiberglass door advantages:

AUTHENTIC WOOD LOOK

- ▶ Finishes easily & beautifully
- ▶ Available smooth (paintable) or wood grain textured (paintable and stainable)
- ▶ True square-edge construction creates an authentic wood door appearance & provides excellent dimensional stability
- ▶ Durability - Fiberglass doors will not rust Resists denting and warping
- ▶ Limited lifetime warranty
- ▶ Rot resistant composite bottom rail and door facing

MULTI-PANE DECORATIVE AND CLEAR GLASS DESIGNS PROVIDE ADDED INSULATING AND VALUE

- ▶ Insulated inner core insulates 5x better than real wood
- ▶ ENERGY STAR eligible
