

Headlining Hardware 2019

1. DARK KITCHENS

The trends for darker kitchen cabinetry and Scandi Noir help to explain the fact that searches for black and navy blue kitchens are up 93% in past six months, with matt and powdery finishes paired together with brushed gold or brushed bronze hardware. One of the strongest style trends that has come through in modern kitchen design is the color blue with brushed gold hardware, and this can be traced from classic Shaker style kitchens right through to chic and minimal modern spaces. Whether it's on cabinetry or splashbacks, blue has replaced grey as the go-to, on-trend color – and it is particularly navy blue kitchens finished off with beautiful brushed gold hardware that are turning heads at Arrowhead Stairs & Trim.

2. BRASS HARDWARE AND FAUCETS

Like a piece of jewelry, taps add the finishing touch to a bathroom or kitchen. On-trend brass hardware and faucets add some welcome shine to pared-down concrete bathrooms, or give extra punch to timeless marble bathrooms. They're not out of place in kitchens either, as this cool new kitchen brand proves. Brass offers a cool contrast to modern concrete workshops, and add warmth to minimalist white kitchens. But it's not all about brass – industrial style, factory inspired hardware and faucets are making waves in both kitchens and bathrooms, giving off cool and edgy vibes.

3. Multi-Tasking Mirrors

Yes, you heard right – mirrors will double up in your home, whether that's as lighting devices, entertainment systems or even health trackers. 'Don't be surprised if come 2019 you hear your mirror telling you you're running low on vitamin D or running late for that crucial meeting while you're brushing your teeth in the morning!'
